

FRUTAS Y HORTALIZAS

FEBRUARY - 2017

BUSINESSPAIÑ

FRUITS &
VEGETABLES
FROM SPAIN

Concentramos y potenciamos el futuro del sector:

- 3,5 millones de toneladas anuales
- 2.400 millones de euros
- 40.800 hectáreas
- 24.500 agricultores-socios
- 60.000 trabajadores

The magazine **F&H** -www.fyh.es- provides to the fruits and veg sector from EU the **BusinesspaiÑ**, a useful product with the 500 most important contacts in the production-trading of Spanish companies.

BusinesspaiÑ shows the profile of companies with higher availability and ability to meet the needs of EU markets. For this reason, through large windows is provided more complete information of companies in development and growth phase.

The **BusinesspaiÑ** collects supply, availability according to months and a list of contacts, being mainly accurate to make easier the way of communication between companies at final destination with companies in origin - export + growers.

It is of interests to the magazine F&H that the product has the widest possible dissemination, so that you can access it through our website www.fyh.es/businesspain

STRENGTHS

- We are taking part in a pilot adaptation about BSCI regulation of social responsibility to the reality of European companies.
- As novelty we would like to present our organic products, 45 hectares and our wide range of red leaf lettuce. La Cresta® is our exclusive variety of red leaf lettuce, grown after more than nine years of research from our R&D department.
- Environment and sustainability: Use less chemicals products and replacing them with natural products.
- Own growing in Murcia and Albacete.

ARGUMENTS

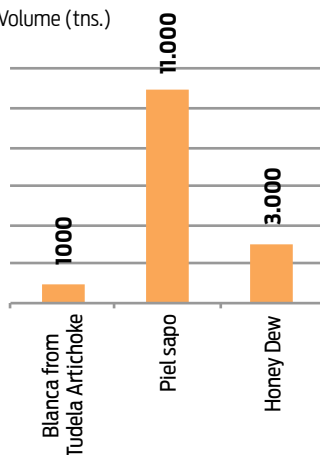

- Export leading in Piel de Sapo melon.
- Traceability for all our products.
- Committed with the best flavour and freshness from the field.
- Committed with the environment.
- Committed with the quality and research.

VALUES

Production of our melons is based on 3 main criteria:

- 1) Reduce the amount of waste (Zero waste 0).
- 2) High brix content (>13 °Brix).
- 3) Preserve the ecosystem through pollination
